Transforming the Workforce for Children Birth Through Age 8 Mar 15 2021 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Analyzing and Reporting Focus Group Results Mar 27 2022 Richard Krueger offers a rich and valuable discussion of focus group analysis that is sure to become a major guide in future focus group efforts. Analysis of focus group data is different from analysis of data collected through other qualitative methodologies and this presents new challenges to researchers. This book overviews important principles guiding focus group research, suggests a systematic and verifiable analysis strategy. Krueger is not doctrinaire: he offers multiple approaches and invites others to share their strategies for analysis. The book is helpful for academic audiences, focus group practitioners and the occasional moderator. The straightforward approach contains hundreds of helpful tips.

Essentialism Dec 24 2021 NEW YORK TIMES BESTSELLER • More than one million copies sold! Essentialism isn't about getting more done in less time. It's about getting only the right things done. "A timely, essential read for anyone who feels overcommitted, overloaded, or overworked."—Adam Grant Have you ever: • found yourself stretched too thin? • simultaneously felt overworked and underutilized? • felt busy but not productive? • felt like your time is constantly being hijacked by other people's agendas? If you answered yes to any of these, the way out is the Way of the Essentialist. Essentialism is more than a time-management strategy or a productivity technique. It is a systematic discipline for discerning what is absolutely essential, then eliminating everything that is not, so we can make the highest possible contribution toward the things that really matter. By forcing us to apply more selective criteria for what is Essential, the disciplined pursuit of less empowers us to reclaim control of our own choices about where to spend our precious time and energy—instead of giving others the implicit permission to choose for us. Essentialism is not one more thing—it's a whole new way of doing everything. It's about doing less, but better, in every area of our lives. Essentialism is a movement whose time has come.

ISSIIDIOLIGY Vol 6. Bioenergetic processes of formation of the Focus Dynamics of Self-Consciousness Jan 31 2020 In the sixth volume of Issiidiology Fundamentals, the author invites the reader to delve into the study of the creative activity of our Self-Consciousness through the specific characteristics and interaction features of various biosystems of the human body. One of the most valuable results achieved by the author in this work is the formation of clear connections between biochemical neurohormonal processes in the body and our mental capabilities, individual awareness and quality of our choices. The author shows that it is not spontaneous hormonal activity caused by the environment, instinctive habits and the same diet, but our volitional efforts, mental attitude, concentration on our own aspirations, as well as a multitude of very different Conceptions, determine both the state of our health and the comfort of our moral attitudes, and scenarios of our fate (a series of our choices). The description of the psychodynamics of our Self-Consciousness on a level-by-level basis: from the most primitive, instinctive to the most conscious, harmonious, possessing creative and constructive tendencies, may be no less significant for the reader. Perhaps this approach to the study of human consciousness will seem unexpected and unreasonable to some, but the reader will not be able not to agree that by studying the human psyche in this interpretation, he will naturally begin to self-analyze own reactions and mental states. This, in many respects a practical method of human cognition, has much more significant potential than it might seem at first glance.

Educated Jan 13 2021 #1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves

her survivalist family and goes on to earn a PhD from Cambridge University “Extraordinary . . . an act of courage and self-invention.”—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA’S FAVORITE BOOKS OF THE YEAR • BILL GATES’S HOLIDAY READING LIST • FINALIST: National Book Critics Circle’s Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara’s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she’d traveled too far, if there was still a way home. “Beautiful and propulsive . . . Despite the singularity of [Westover’s] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?”—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The Oprah Magazine • Time • NPR • Good Morning America • San Francisco Chronicle • The Guardian • The Economist • Financial Times • Newsday • New York Post • theSkimm • Refinery29 • Bloomberg • Self • Real Simple • Town & Country • Bustle • Paste • Publishers Weekly • Library Journal • LibraryReads • Book Riot • Pamela Paul, KQED • New York Public Library

Site Reliability Engineering Apr 15 2021 The overwhelming majority of a software system’s lifespan is spent in use, not in design or implementation. So, why does conventional wisdom insist that software engineers focus primarily on the design and development of large-scale computing systems? In this collection of essays and articles, key members of Google’s Site Reliability Team explain how and why their commitment to the entire lifecycle has enabled the company to successfully build, deploy, monitor, and maintain some of the largest software systems in the world. You’ll learn the principles and practices that enable Google engineers to make systems more scalable, reliable, and efficient—lessons directly applicable to your organization. This book is divided into four sections: Introduction—Learn what site reliability engineering is and why it differs from conventional IT industry practices Principles—Examine the patterns, behaviors, and areas of concern that influence the work of a site reliability engineer (SRE) Practices—Understand the theory and practice of an SRE’s day-to-day work: building and operating large distributed computing systems Management—Explore Google’s best practices for training, communication, and meetings that your organization can use

In this essential resource, teachers will receive: Proven, classroom-tested advice delivered in an approachable, teacher-to-teacher style that builds confidence Practical strategies for streamlining instruction in order to focus on key beliefs and literacy-building activities Solutions and suggestions for the most common teacher and student “hang-ups” Numerous recommendations for deeper reading on key topics

To Err Is Human Feb 11 2021 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That’s more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. To Err Is Human breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients’ expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, “How can we learn from our mistakes?” Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. To Err Is Human asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

Neuro-Discipline Aug 20 2021 Control your brain so it doesn't control you. A science-based approach to getting things done and avoiding laziness and procrastination. Our brains are not wired for goal achievement. They are wired only for speed, survival, and the present moment. It's time to defeat this primal tendency and make self-discipline your new normal. Stop leaving tasks unstarted and/or unfinished. You're better than that. Neuro-Discipline tells the tale of two battling brains, and why we are predisposed to laziness and energy conservation. Time after time, we take the path of least resistance to our detriment. The key to beating this is understanding the brain's imperatives and working with them. Neuro-Discipline is your layperson's guide to self-discipline success - just enough biology and psychology to give important context, while ensuring that you don't get stuck in the minutiae. This isn't a textbook; it has over 20 actionable tips you can use TODAY. Peter Hollins has studied psychology and peak human performance for over a dozen years and is a bestselling author. He has worked with dozens of individuals to unlock their potential and path towards success. His writing draws on his academic, coaching, and research experience. Learn to beat your temptations, excuses, and weaknesses. •Learn about the two brains and the two versions of you that are always locked in battle. •How to trick the brain for action and productivity without working against it. •The role of dopamine and how we can simulate it for our own purposes. •How to talk to yourself and design your environment to stay on track. •Reframing excuses and dissecting your emotional reactions. •How to create a calm mind for ruthless execution. Discomfort, boredom, frustration, and laziness are temporary. Self-discipline is forever. We aren't meant to lie in bed and relax. We are meant to pursue our goals and find satisfaction and fulfillment. Along the way, self-discipline is the most required ingredient. The ability to do unpleasant and uncomfortable things is what determines how our lives play out. How will you live your life?
